

We help patients remain independent and secure in the surroundings of their own home. From meal preparation and light housekeeping to assistance with mobility and temporary personal care needs such as bathing, Indiana Home Health Aides are there when your loved ones need them.

## **IV Therapy**

We provide IV Therapy services ranging from pain control to TPN (Total Parental Nutrition). A high tech nursing team comprised of specially trained LPN's and RN's provides these services.

## **Wound Care Therapy**

We offer Wound Care services that range from simple to complex for patients with a variety of wound care needs such as diabetic or decubitus ulcers. All wound care nurses receive special training from the Wound Care Center in Bloomington, Indiana.

## **Ventilator – Respiratory Therapy**

Ventilator services are provided by specially—trained nurses, who are able to provide continuous care seven days a week, 24 hours a day.

## **Diabetic Therapy and Care**

Diabetic Therapy and Care is balanced between medical care and medical education. Our nursing staff works with patients to educate them on relevant issues to a diabetic's health such as nutrition and diet, medication, and foot care. Nurses can also provide assistance with medication preparation and management.

## **Cardiac Care**

Our skilled nursing staff provides post-operative cardiac care. Additionally, nurses focus on nutritional and diet needs, medication education, and medication compliance. Cardiac assessment and heart monitoring are also offered.

## **Quadriplegic/Paraplegic Care**

Continuous, 24 hour, seven-days a week care is provided by staff who are specially trained to provide care for patients with spinal cord injuries.

## **Post Surgery Care**

Specially trained to meet nutritional, rehabilitation, and incisional/wound care needs, our staff provides rehabilitation, recovery and transitional post surgery care.

## **Cancer Care**

Our staff is trained to provide a number of services to assist patients with the recovery and treatment of cancer. Services range from personal care, including nutritional guidance, medication administration, and infection control needs, to maintenance and care of vascular access devices.

## **Well Baby Checks**

Our specially trained nursing staff provides post hospitalization mother and baby wellness health check-ups.
